

Visual Aids & Eyeglasses

The world's first visual aid was invented in the century.
Reading stones were made of glass or quartz.

Who used reading stones in the Middle Ages?

-
-

Look at the **rivet spectacles** very carefully.
 What are the frames made out of?

-
-
-

Why are these called **scissor spectacles**?

.....

How do the frames for a **lorgnette** differ from scissor spectacles?

.....

When were the frames we have today invented? What do you call them?

.....

Glasses are not just used to correct visual defects. Some glasses are designed to protect our eyes when performing certain activities. Name three examples!
